Be Lead Safe!

Check your environment for the following possible sources of lead poisoning:
☐ Bare soil, especially near major roads, and near drip line of house
☐ Old painted playground equipment
☐ Vinyl playground equipment
☐ Car batteries
☐ Vinyl mini-blinds, vinyl telephone cords, and other vinyl products
☐ Water contaminated from lead solder or brass pipes
☐ Old painted wooden cribs, old painted toys, and painted antiques
☐ Painted walls that are peeling or chipping
, , , , ,
Lead-based paint on the walls inside or outside of the building (dust)
Imported crayons, pottery, toys, candies, canned goods, and printed materials
☐ Vinyl children's toys
☐ Water coolers (drinking fountains)
☐ Stained glass
Brass (figurines, bells etc.), bullets and fishing weights
☐ Artist paints and lead glazes
If you have checked any of the above, keep children away from the area or object until
you can confirm that lead is present and take the appropriate actions to prevent lead
poisoning.
Follow these basic steps to help prevent children from being lead poisoned:
☐ Have your water, soil, paint, and dust tested for lead by an Environmental Health
Specialist at the local Health Department
Specialist at the local Health Department Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes
Specialist at the local Health Department Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes over the bare soil
Specialist at the local Health Department Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes over the bare soil Supervise children at play to prevent them from eating soil or paint chips
Specialist at the local Health Department ☐ Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes over the bare soil ☐ Supervise children at play to prevent them from eating soil or paint chips ☐ Remove and replace old painted or vinyl playground equipment
Specialist at the local Health Department ☐ Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes over the bare soil ☐ Supervise children at play to prevent them from eating soil or paint chips ☐ Remove and replace old painted or vinyl playground equipment ☐ Keep items such as old car batteries and old paint containers from children's reach
Specialist at the local Health Department ☐ Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes over the bare soil ☐ Supervise children at play to prevent them from eating soil or paint chips ☐ Remove and replace old painted or vinyl playground equipment ☐ Keep items such as old car batteries and old paint containers from children's reach ☐ Remove vinyl mini-blinds and replace them with certified lead free mini-blinds
Specialist at the local Health Department ☐ Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes over the bare soil ☐ Supervise children at play to prevent them from eating soil or paint chips ☐ Remove and replace old painted or vinyl playground equipment ☐ Keep items such as old car batteries and old paint containers from children's reach ☐ Remove vinyl mini-blinds and replace them with certified lead free mini-blinds ☐ Use only cold water that has run for a few minutes for cooking, drinking, or making
Specialist at the local Health Department Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes over the bare soil Supervise children at play to prevent them from eating soil or paint chips Remove and replace old painted or vinyl playground equipment Keep items such as old car batteries and old paint containers from children's reach Remove vinyl mini-blinds and replace them with certified lead free mini-blinds Use only cold water that has run for a few minutes for cooking, drinking, or making baby formula
Specialist at the local Health Department ☐ Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes over the bare soil ☐ Supervise children at play to prevent them from eating soil or paint chips ☐ Remove and replace old painted or vinyl playground equipment ☐ Keep items such as old car batteries and old paint containers from children's reach ☐ Remove vinyl mini-blinds and replace them with certified lead free mini-blinds ☐ Use only cold water that has run for a few minutes for cooking, drinking, or making baby formula ☐ Do not let children chew on painted surfaces such as porch rails and old baby cribs
Specialist at the local Health Department ☐ Cover bare soil with six inches of lead free soil or mulch, and plant grass or bushes over the bare soil ☐ Supervise children at play to prevent them from eating soil or paint chips ☐ Remove and replace old painted or vinyl playground equipment ☐ Keep items such as old car batteries and old paint containers from children's reach ☐ Remove vinyl mini-blinds and replace them with certified lead free mini-blinds ☐ Use only cold water that has run for a few minutes for cooking, drinking, or making baby formula ☐ Do not let children chew on painted surfaces such as porch rails and old baby cribs ☐ Don't vacuum paint chips or dust. Always damp mop or wipe. If you must vacuum
